SUMMARY

Computer Science graduate with a specialization in Artificial Intelligence and hands-on experience in Machine Learning, Web Development, NLP, and 3D Avatar-based Sign Language Translation systems. Proficient in Python and full-stack development, with a passion for building AI-powered solutions that improve accessibility and solve real-world challenges.

EDUCATION

Chhattisgarh Swami Vivekanand Technical University	2022 - 2026
<i>B.Tech (Hons.) in CSE (Artificial Intelligence)</i>	<i>CGPA-8/10</i>

EXPERIENCE

Undergraduate Research Intern	Jan 2025 – June 2025
<i>Indian Institute of Technology (BHU)</i>	<i>Varanasi</i>
- Tech Stack: Python, MediaPipe, Blender, Web Development - Developed an AI-powered Sign Language Interpreter that converts voice and text into animated 3D avatar gestures for hearing-impaired users. - Integrated speech processing and gesture generation pipelines to improve accessibility and communication. - Implemented avatar animation workflows using MediaPipe-based motion data. - Designed a responsive website to showcase research projects and accessibility tools developed in the lab.	

PROJECTS

Smart Job Finder Bot <i>Make.com, Google Sheets, REST API, Gmail</i>	2026
- Built an automated job aggregation system that fetches job listings from external APIs. - Filtered and organized relevant job opportunities into Google Sheets. - Configured automated email alerts to deliver personalized job recommendations.	
AI Resume Analyzer <i>Python, Flask, React.js, spaCy, REST API</i>	2026
- Developed a full-stack web application that analyzes resumes using NLP techniques. - Extracted candidate skills, calculated ATS scores, and predicted suitable job roles. - Implemented resume improvement recommendations through an interactive dashboard.	
Yatra Sangwari  <i>HTML, CSS, JavaScript</i>	2024
- Developed a travel companion website to promote tourism across Chhattisgarh. - Provided city-wise information about tourist attractions and travel destinations. - Designed a responsive and user-friendly interface for seamless navigation.	
Blood Donor Registration System  <i>HTML, CSS, JavaScript, SQL</i>	2023
- Developed a web-based blood donor registration system to simplify donor management. - Designed intuitive forms for donor registration and information collection. - Integrated database functionality for storing and retrieving donor records.	

SKILLS

Languages: Python, C, C++, MySQL, JavaScript, HTML/CSS
Frameworks: Node.js, Flask, FastAPI
Developer Tools: Git, Github, VS Code, PowerBI, Blender3D
Interpersonal Skills: Problem Solving, Team Collaboration, Communication, Quick Learner

ACHIEVEMENTS & CERTIFICATIONS

HackerRank: Python (5), C (5), SQL (4), C++ (4), R (Basic), CSS (Basic), SQL (Basic)
MathWorks: Machine Learning Onramp, MATLAB Onramp
Infosys: Generative AI, Introduction to AI
NPTEL: Computer Vision, Management Information System

LEADERSHIP & ACTIVITIES

- Member of Training & Placement Cell (TPO), UTD-CSVTU
- Event Coordinator for multiple university-level events and member of the Art & Cultural Club
